Geography recommended reading

Want to really understand Geography? If you have only got a few hours or minutes, why not check out some of the resources below?

Book	What is it about?	Theme
 Empire Antarctica: Ice, Silence & Emperor Penguins (Gavin Francis)	Following the penguins throughout the year -- from a summer of perpetual sunshine to months of winter darkness -- Gavin Francis explores a world of great beauty conjured from the simplest elements, the hardship of living at 50°C below zero and the unexpected comfort that the penguin community bring.	Biodiveristy Frontiers Climate
 Chinese Cinderella (Adeline Yen Mah)	An autobiography following the life of a Chinese child growing up in hardship. Great reviews! <div>Fiction</div>	China Development
 The Carbon Diaries 2015 (Saci Lloyd)	It's January 1st, 2015, and the UK is the first nation to introduce carbon dioxide rationing, in a drastic bid to combat climate change. As her family spirals out of control, Laura Brown chronicles the first year of rationing with scathing abandon. Will her mother become one with her inner wolf? Will her sister give up her weekends in Ibiza? Does her father love the pig more than her? Can her band the dirty angels make it big? And will Ravi Datta ever notice her? <div>Fiction</div>	Climate Change
 Running Wild (Michael Morpurgo)	The epic and heart-rending jungle adventure from the nation's favourite storyteller Michael Morpurgo. <div>Fiction</div>	Tropical Rainforests
 The Explorer (Katherine Rundell)	From his seat in the tiny aeroplane, Fred watches as the mysteries of the Amazon jungle pass by below him. He has always dreamed of becoming an explorer, of making history and of reading his name amongst the lists of great discoveries. If only he could land and look about him. As the plane crashes into the canopy, Fred is suddenly left without a choice. Won lots of prizes! <div>Fiction</div>	Tropical Rainforests
 A Short History of Nearly Everything and Notes from a small island (Bill Bryson)	Ever wondered how we got from nothing to something? Or thought about how we can weigh the earth? Or wanted to reach the edge of the universe? Uncover the mysteries of time, space and life on earth in this extraordinary book - a journey from the centre of the planet to the dawn of the dinosaurs, and everything in between.	Tectonics Hazards Biodiversity Ecosystems
 Trash (Andy Mulligan)	Raphael lives on a dumpsite, eking out a living sifting through rubbish. One unlucky-lucky day, he makes an extraordinary and deadly discovery. Now he and his two friends, Gardo and Rat, are wanted by the corrupt forces that run the city and will stop at nothing to get back what they've lost. From the slums to the mansions of the elite, it's going to take all of their quick-thinking and fast-talking to stay ahead. And to stay alive. <div>Fiction</div>	Urbanisation Development

	How Population will transform our World (Sarah Harper)	Predicting the shape of our future populations is vital for installing the infrastructure, welfare, and provisions necessary for society to survive. There are many opportunities and challenges that will come with the changes in our populations over the 21st century	Population Health Development
	Our Choice (Al Gore)	Follows on from An Inconvenient Truth. Al Gore thinks about how to solve the issue of global climate change	Natural Hazards Climate change
	Prisoners of Geography: Ten Maps That Tell You Everything You Need To Know About Global Politics (Tim Marshall)	Splitting the world into 10 distinct region this book Looks at the past, present and future to offer an essential insight into one of the major factors that determines world history. A great book about geopolitics	Changing Economic World Development.
	How Bad Are Bananas?: The carbon footprint of everything. (Mike Berners-Lee)	By talking through a hundred or so items, Mike Berners-Lee looks at our <i>carbon instinct</i> for the footprint of literally anything we do, buy and think about. The book ranges from the everyday (foods, books, plastic bags, bikes, flights, baths...) and the global (deforestation, data centres, rice production, the World Cup, volcanoes, ...) Be warned, some of the things you thought you knew about green living may be about to change.	Sustainability Climate change Resource Management
	Factfulness (Hans Rosling)	A radical new explanation of our world. Hans Rosling explains why the world isn't in quite such a bad shape as we thought and why we so often get our facts wrong.	Changing Economic World Development.
	10 Billion (Danny Dorling)	Explores how we got to 10 billion and the key issues that we face in the coming decades including how to deal with scarcity of resources and how our cities will grow and how we should prepare for population decline.	Urbanisation Economic World
	No. More. Plastic.: What you can do to make a difference – the #2minuteresolution (Martin Dorey)	Open this book with your children, give it to your friends. Share your #2minuteresolution on twitter and instagram and inspire others. Martin Dorey, anti-plastics expert, has been The book has proven that collective small actions can add up to a big difference. Together we can fix this.	Resource Management
	No One Is Too Small to Make a Difference (Greta Thunberg)	In August 2018 a fifteen-year-old Swedish girl, Greta Thunberg, decided not to go to school one day. Her actions ended up sparking a global movement for action against the climate crisis, inspiring millions of pupils to go on strike for our planet, forcing governments to listen, and earning her a Nobel Peace Prize nomination.	Climate change
	There Is No Planet B: A Handbook for the Make or Break (Mike Berners-Lee)	What are the impacts of our actions? What are the key environmental and economic challenges we face?	Sustainability Climate change

	When the Rivers Run Dry: The Global Water Crisis and How to Solve It (Fred Pearce)	This examines the world's water crisis. But with 7.5 billion people competing for this single unevenly-distributed resource, the planet is drying up. In <i>When the Rivers Run Dry</i> , Fred Pearce explores the growing world water crisis	Rivers Resource Management Water Security Climate Change
	Climate Wars: The Fight for Survival as the World Overheats (Gwynne Dyer)	Bringing together extensive interviews and latest research, this book reveals the realities of a planet facing scarce food, water and land. Can our technology save us, or is it too late?	Natural Hazards Climate change Resource Management Food and water resources.
	Our Final Warning: Six Degrees of Climate Emergency (Mark Lynas)	A look at the future if current rates of warming increase. The book talks through the different scenarios of a 1 to 6°C of warming.	Climate Change
	The Future of Energy: 2020 (John Michael Armstrong)	The author takes you on a journey through a range of environmental scenarios (home heating, air travel, industrial consumption) where energy is the problem but also, potentially, brings a range of solutions.	Sustainability Climate change Resource Management Energy Security
	The Almighty Dollar (Dharshini David)	Follows \$1 from a shopping trip in Texas, via China's central bank, Nigerian railroads, the oilfields of Iraq and beyond to reveal the complex relationships of our new globalised world. Ties into economic world, trade, development and also has a chapter on China investing in Nigeria	Changing Economic World Development Globalisation
	The Bottom Billion (Paul Collier)	Looks at the growth of the development gap - why countries are poor. Also globalisation and the way it can help countries develop.	Changing Economic World Development, Globalisation
	Connectography (Parag Mehta)	Looks at megacities and how globalisation is eroding borders.	Changing Economic World Development Globalisation
	Divided (Tim Marshall)	From the same author as <i>Prisoners of Geography</i> Which side of the fence are you on? The book looks at how money, race, religion, politics are the things that divide us. An essential book looking at what is going on today	Changing Economic World Development Globalisation
	Worth Dying For (Tim Marshall)	Nine chapters (covering the USA, UK, Europe, Middle East, Asia, Africa, Latin America, international flags and flags of terror), Tim Marshall draws on more than twenty-five years of global reporting experience to reveal the histories, the power and the politics of the symbols that unite us – and divide us.	Changing Economic World Development Globalisation

	The Silk Roads (Peter Frankopan)	A look at the interconnections between the silk roads travelling eastwards from Europe to China Via The Middle East and Russia.	SuperPowers
	Poverty Safari understanding the Anger of Britain's Underclass (Darren McGarvey)	The author has experienced poverty and its devastating effects first-hand. He knows why people from deprived communities all around Britain feel angry and unheard	Regenerating place changing places
	Extreme Cities: The Peril and Promise of Urban Life in the Age of Climate Change (Ashley Dawson)	How will climate change affect our lives? Where will its impacts be most deeply felt? Are we doing enough to protect ourselves? Today, the majority of the worlds megacities are located in coastal zones, yet few of them are adequately prepared for the floods that will menace their shores.	Climate Change Natural Hazards Coasts
	Ten Billion (Stephen Emmott)	<i>Ten Billion</i> is a book about every one of us. It's about our failure: failure as individuals, the failure of business, and the failure of our politicians. It is about an unprecedented planetary emergency. It's about the future of us.	Climate Change Resource Management
	Adventures in the Anthropocene (Gaia Vince)	The changes we humans have made in recent decades have altered our world beyond anything it has experienced in its 4.6 billion-year history. As a result, our planet is said to be crossing into the Anthropocene – the Age of Humans. This book examines these changes and looks as what life is really like for the people on the frontline of the planet we've made.	Sustainability Climate change Resource Management
	This is the way the World ends (Jeff Nesbitt)	Our world is in trouble - right now. This book tells the real stories of the substantial impacts to Earth's systems unfolding across each continent from longer droughts in the Middle East to the monsoon season shrinking in India. A blueprint for real-time, workable solutions we can tackle together.	Middle East Sustainability Climate change Resource Management

KS5 specific recommendations

- *Crude Impact* (Geopolitics of the oil industry/oil consumption)
- *Cowspiracy* (Global warming and meat production)
- *Great Barrier Reef* by Richard Fitzpatrick
- *The True Cost* – The garment industry
- *Under the Sun* – North Korea from the inside out.

Geography recommended watching

Films:

The Constant Gardener	A drug company exploits the Kenyan population to allow them to test a new drug, despite the fact they know it has harmful side effects. Good for economic world and the impact of TNCs on LICs
The Full Monty	A group of unemployed men from Sheffield go to desperate measures to make some money. Good for economic world and the N/S Divide
City of God (ask at home – it's an 18 certificate for a reason)	Growing up in a Rio de Janeiro slum, Rocket is able to avoid being drawn into a life of drugs and crime by having a passion for photography.
The Age of Stupid	A survivor beams back his views of our lack action on climate change from a ruined future planet earth. About climate change, energy consumption and production via some interesting case studies.
Slumdog Millionaire	Life in within the shanty towns of Mumbai. Good film to see what life is like in a shanty town/ squatter settlement. Good for KS3 and KS4 geographers.
Brassed Off –	Similar in era to the Full Monty this film shows industrial decline in the UK. Good for looking at the N/S Divide.
Under the Dome	Documentary film about the frightening level of pollution in China and the challenges of urban living
An Inconvenient Truth	Al Gore's ground-breaking climate change movie. A must for anyone interested in climate change.
The Day After Tomorrow	Climate change has never been this traumatic! Be careful as a lot of this is fiction!
Dante's Peak –	Shows most of the features of a volcano.
Twister	The formation and impact of a twister
The Impossible (be aware it is based on real life so has upsetting scenes)	Based on the events of the Boxing Day 2004 tsunami which occurred in the Indian Ocean where an earthquake measured 9.1 killing over 200,000. A gripping film!
Before the flood	Leonardo DiCaprio presents the dangers of climate change and solutions through meeting scientists, activities and world leaders.
